A Personal Message to Our Friends and Patrons

1934 marks our 40th year in the nursery business in the same locality. From a small beginning in fruit trees and plants, we have grown to the point where we now offer a complete line of material, both fruit and ornamental. Our service has also expanded with the years.

We have continued to keep in mind our watchword of —QUALITY—in both materials and service, at consistently reasonable prices, and we invite your continued patronage on that basis.

As time goes on, there is an increasing demand for competent Landscape Service and to give you some idea of our work in this line, you will find several illustrations in this catalog. We make no charge for plans and can take care of your planting at a nominal charge if desired.

The glimpse of part of our nurseries from the air, on the center pages, will probably be of interest, especially to those who have not yet visited us.

One of our Highway Signs

AN INVITATION TO VISIT OUR NURSERIES

We invite everyone interested in trees and plants to visit our Nurseries, which are conveniently located on Route 72, on the Lancaster-Manheim-Lebanon Highway, which passes through our Nurseries.

Whether you are traveling South from Manheim or North from East Petersburg on this road, you cannot miss our signs placed on the side to the East. After you see one of these signs you will be directed by other signs to the office and display grounds.

If you are not acquainted with the location of our Nurseries, a little study of the above map will help you to get to us very easily. There will be someone in attendance during daylight hours on week days.

No business transacted on Sundays.

EVERGREENS

One of our plantings at the home of Mr. H. F. Weit,
336 S. State St., Ephrata, Pa.

These Evergreens have been transplanted frequently. Each time they have been given ample room for proper growth and are sheared each season into a symmetrical shape. They are freshly dug in the nursery for your individual order, balled and burlapped.

Most of the following varieties (including Mugho Pine) may be trimmed and used for Foundation planting, etc. However, the Abies or Firs, the Piceas or Spruces, and the Pinus or Pines grow large and should be used for specimens, screens or for massing where there is plenty of room for them to develop.

LIGUSTRUM—PRIVET

Ligustrum ovalifolium, 9'-10'

CALIFORNIA PRIVET

The most popular hedge plant on account of its beauty, adaptability, and low cost.

To find the exact number wanted, measure the space where it is to be planted and multiply the number of feet by two. They should be planted 3 inches deeper than they stood in the nursery row. Set the plants 6 inches apart in the row. Dip the roots in water before planting. After plants are set, cut them down to 4 inches from the surface of the ground. This will cause a thick new growth to start and is very essential for a beautiful hedge.

When cutting, each time allow about 1 to 2 inches above where it was cut before, until you get the height desired

Two-year—cut back and well branched. Will give immediate effect.

CANNAS Cannas for Color

For a flaming, gorgeous color effect, give us Cannas. They outshine most other plants, yet they are never gaudy. In beds they are extremely effective.

HOW TO MAKE A ROUND CANNA BED

Plant 1 Canna in the center, 6 in the first circle, 12 in the second circle, then 18, 24, etc., according to the size of the bed, with the circles 18 inches apart, and the plants in the circle 18 inches apart. A bed 4 feet in diameter takes 7 Cannas; a 7-foot bed, 19 Cannas; a 10-foot bed, 37 Cannas; a 16-foot bed, 91 Cannas.

The President. 4 ft. Far and away superior to any other scarlet Canna ever produced. This beauty, with its massive heads of glowing scarlet, is in a class by itself for brilliant effect and is used by practically every park superintendent who needs a vivid red in his plantings.

King Humbert. 4 ft. Flower orange-scarlet, streaked crimson. Foliage ebony. Its unusually handsome foliage, which is equaled by no other variety, makes this Canna as popular as is the President for its gorgeous flowers.

King Midas. 4 ft. Very large, beautifully formed, firm flowers of glittering golden yellow.

Victory. 3 ft. The throat of the flower is glowing apricot which shades to a suffusion of pinkish-buff or summer sunset tints over the petals, finally edging off to a distinct border of maize-yellow. Flowers are medium in size.

APPLES

Apple trees should be set 32 to 40 feet apart.

Fillers. Most commercial orchards are now planted with standard varieties, 40 feet apart each way. Quick, upright growing, early maturing varieties are used as fillers, planting between standards to make 20 ft. apart; fillers to be removed when the standard trees require the room (12 to 18 years). This requires 28 standard and 82 fillers to the acre. **We recommend for fillers:** Yellow Transparent, Oldenburg, Grimes Golden, McIntosh and Wealthy, or peach trees.

SUMMER APPLES

- Benoni.** Attractive, red, best eating apple of its season. Early bearer and very productive.
- Early Harvest.** Medium, pale yellow, tender, juicy.
- Oldenburg (Duchess of Oldenburg).** Good size, yellow, streaked red, juicy, sub-acid, productive.
- Summer Rambo.** Very large; flesh yellow, firm, tender, very juicy, mild sub-acid.
- Red Astrachan.** Large, beautiful deep crimson. A favorite eating and cooking apple.
- Yellow Transparent.** Earliest and best; white, tender, juicy, sprightly, sub-acid. Grows rapidly, bears young, and makes a profitable "filler."

AUTUMN APPLES

- Gravenstein.** Large striped, fine quality, one of the best fall sorts.
- Maiden Blush.** Large, beautiful, blush cheek.
- Smokehouse.** An old favorite, originated in Lancaster Co., Pa.
- Wealthy.** Medium size, smooth, round, deep red; handsome and of fine quality.

WINTER APPLES

- Baldwin.** Red, large, fine quality, tree vigorous.
- Winter Banana.** Size large, golden yellow with bright crimson red.
- Cortland.** This is a promising new variety originated at the Horticultural Experimental Farms, Geneva, N. Y. The fruit is medium to large in size, of a bright red color. Flesh is pure white.
- Delicious.** Red and yellow; fine grained, and quite juicy; flavor slightly acid, but very good.
- Falawater** (sometimes called **Pound Apple**). Large; yellowish green fruit.
- Storage and Packing House in Background*
- Grimes Golden.** No orchard complete without it. Yellow, best quality and productive. For either home or market for this season there is nothing better.
- Hubbardston.** Large, red, striped, tender, juicy.
- Jonathan.** Medium; red, extra quality.
- McIntosh.** Large, deep crimson, highest quality, juicy, sub-acid.
- Paradise Winter Sweet.** Large; creamy, rosy-cheeked.
- Rome Beauty.** Large, yellow, shaded red; tender, juicy, sub-acid.
- Red Rome.** Same as Rome Beauty, better color.
- Red Stark.** Better color than Stark listed below.
- Stark.** Large, striped light and red, juicy, mild, sub-acid. An early and abundant bearer, good keeper.
- Stayman Winesap.** Of the several important descendants of Winesap, this variety is leaping into prominence as a splendid sort for the home or commercial orchard. The tree is a sturdy grower and a very heavy producer. It is adapted to a wide range of soils and climates, thriving almost wherever planted. It runs to large sizes. The fruit is of deep red color, with firm flesh, tender, juicy, and the same rich flavor of the parent. We strongly recommend this variety for the home or commercial orchard.
- York Imperial.** Medium to large; yellow, shaded red; firm, juicy, sub-acid.

CRAB APPLES

Hyslop. Large; deep crimson; one of the most beautiful; very popular.

Transcendent. For many years the most popular crab apple. Fruit about an inch in diameter, yellow, with red cheek.

PEACHES

We are offering only a limited number of varieties, ones that you can depend on giving you a good crop of fruit. We do not think it worth while to propagate a large number of varieties, when a few of the best will make more money for our customers. The peach crop is quite sure if you give your trees proper attention.

ARRANGED IN ORDER OF RIPENING

Greensboro. The very best extra early commercial sort. Hardy and productive, fruit large and tree healthy. Color white with crimson cheek.

Carman. White with red blush. Carman is extra hardy, bears every year, and when it fails all else fails too. Tree a very robust grower and produces heavily.

Golden Jubilee. Developed and introduced by the New Jersey Experimental Station—A high quality, Early, Yellow, Freestone Peach.

Rochester (Free). Large yellow and red Peach. Flesh yellow, of fine quality and exquisite flavor.

Hiley (Early Belle). The earliest commercial white freestone peach. It resembles Belle of Georgia, but in quality is superior to most of its white-fleshed competitors. The pretty red cheek and good shipping qualities make it very popular for early market.

Champion. Large variety, creamy white, red cheek, sweet, rich and juicy. Hardy and productive.

Belle (Belle of Georgia). Very large; skin white with red cheek; flesh white, firm and of excellent flavor. Tree a rapid grower, very prolific.

Capt. Ede. A handsome yellow peach of excellent quality; hardy in bud and blossom.

J. H. Hale. Probably no new peach has ever been introduced claiming to be so much superior in all ways. It averages one-third to one-half larger than Elberta, ripens about five days earlier and is much superior in flavor. Color a beautiful golden-yellow with deep carmine blush.

South Haven. Immediately preceding Elberta, it is better than average size, globular, prolific, with dependably recurring crops. Its meat is yellow, juicy and delicious; cheek yellow with one red blotch.

Elberta. Large, yellow, with red cheek; flesh yellow, firm, juicy, of high quality. Exceedingly prolific, sure bearer and hardy. The leading market variety.

Late Crawford. A superb, large, yellow peach.

Mathews (Dr. Funk's strain). Very similar to Elberta but of better quality.

ROOT'S NURSERIES, INC.

- Old Mixon Free.** Large, pale yellow, deep red cheek, white flesh, tender, rich, good.
- Stump.** Large, white, bright red cheek.
- Salway.** A late yellow variety. Latter part of September.
- Iron Mountain.** Ripens September 15 to October 1. Fruit is of large size; color, white.

- Clapp's Favorite.** Summer. Fruit large, yellow lemon color, spotted with brown dots; flesh fine, rich and sweet. A very good one.
- Duchesse.** Very large, buttery, rich, juicy, excellent. It succeeds to perfection and is the most popular market variety as a dwarf. Oct. and Nov.

MANHEIM, PENNSYLVANIA

Kieffer. Its large size, handsome appearance, and remarkable keeping and shipping qualities make it very profitable for market. Oct. and Nov.

Seckel. Small; skin rich yellowish brown when fully ripe, with deep brownish red cheek; flesh very fine-grained, sweet, exceedingly juicy, melting, buttery; one of the richest and highest flavored pears known. Sept. and Oct.

Sheldon. A large, round, russet and red pear of very fine quality; melting, rich, delicious. Tree vigorous, erect, handsome; bears well and should be more largely planted. October.

Abundance. One of the oldest and best varieties; hardy, productive. Fruit large, lemon yellow, with heavy bloom; good quality. August.

Burbank. Most profitable among growers for market. Ripens 10 days after Abundance. Tree hardy.

October Purple. A strong, vigorous grower, hardy, productive, of good quality, a large, round, late purple plum, especially recommended for late market.

Red June. One of the vigorous, upright growers; productive; fair size, vermilion red; pleasant quality. Ripens a week before Abundance. August.

Climax. One of the best of the large, early sweet plums, ripening ahead of other varieties, which makes it a very valuable market sort. July.

Gold. Large, oval, bright yellow; rich, juicy, fine quality. A good grower.

Lombard. Dark purplish-red, hardy, productive.

Bradshaw. A very large and fine early plum, dark violet-red, juicy and good. Very productive; valuable for market. The tree is very hardy and vigorous. Middle of August.

German Prune. Large, dark purple, sweet, good. One of the most popular for canning, because of its sweetness. September.

Italian Prune. Good size, purple, juicy, delicious, fine for drying. September.

Imperial Gage. Large, pale green, juicy, sweet, rich, and excellent. August.

Satsuma (Blood). Large, globular, with sharp point. Color, purple and red with blue bloom; flesh firm, juicy, dark red or blood color, fine quality; pit very small. Hardy and vigorous grower. August.

BOOK DEPARTMENT

Books that tell you how—to plan your garden—to select flowers and plants—to control colors and blooms—to design garden and home grounds—to raise vegetables—to control pests—to feed plants—to care for trees. Ask for free catalog.

TREE SURGERY DEPARTMENT

There has been an increasing demand for a service to our clients whereby their mature trees might be given the proper attention and treatment for preservation. Trees on lawns and under modern conditions are deprived of many of the necessities supplied by nature in forests, such as abundant plant food, moisture, proper soil conditions, etc. All of this tends to lessen the resistance of the tree to disease and pest damage, unless properly cared for.

An inspection and diagnosis by our trained Tree Surgeon will involve no cost or obligation.

This service includes pruning, cavity work, bracing, feeding, etc.

BloomAid

For Flowers, Shrubs, Vegetables

BloomAid is *easy to use*, indoors or out. A tablet or two, or a spoonful of liquid BloomAid in a glass of water—either is enough for a potted plant, now and then. For window boxes, porch boxes, and the flats where the seedlings grow, use granulated BloomAid from a shaker-top pound can or by the spoonful from a five-pound can. Outdoors, in the beds and among the shrubbery and around the hedge, use granulated BloomAid from bags. Full directions with every package.

INSTRUCTIONS TO PURCHASERS

How to Figure Your Order. One to four trees or plants of one variety sold at the each rate; 5 to 25 of one variety at the ten rate; 25 to 250 of one variety at the 100 rate; 250 or more at the 1000 rate.

Orders. Orders should be sent in just as soon as possible after receiving catalog. By placing orders early you are more certain of getting the varieties wanted, as late in the season we are often sold out of some of the varieties. If ordered early we can reserve the stock until proper time for planting.

Shipping. We have the Pennsylvania and Reading Railroads and can ship in any direction with the probability of prompt arrival at destination. All shipments travel at the cost and risk of the purchaser.

Truck Deliveries. Truck load orders will be delivered free, reasonable distances; long hauls and smaller orders delivered by special arrangement. We are well equipped to give good truck service.

Guarantee and Claim. All stock is guaranteed to be true-to-name, dug properly, and in good condition when shipped. Any tree or plant which is untrue to name will be promptly replaced. In case of any error on our part, it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for a greater amount than the original price of the nursery products.—As we have no control over its care and usage after it leaves our hands, we cannot guarantee it to live and grow or to give specific results.—We insist that all claims for damaged or unsatisfactory stock be made promptly.

Our nurseries are inspected every year and every shipment will be accompanied by a Certificate of the State Examiner.

Planting. Proper planting is important and to this end we have developed an organization that is competent to handle planting for you at a nominal charge.

Terms Cash. except when expressly agreed otherwise.

Substitution. We reserve the right in case we are out of a variety, to substitute another of equal merit when it can be done,—unless the order is plainly marked NO SUBSTITUTION. In this case we will fill the order as completely as possible and refund the balance of remittance, if paid in advance.

Prices. The prices quoted in this catalog are F. O. B. our Nurseries except where otherwise noted. They are as low as was consistent at the time of printing, considering wages and other costs. However, they are subject to change without notice.

Agents. We do not run an agency business, but some of our stock finds its way into the hands of dealers, florists and agents, and we are not responsible for their prices nor for any promises made other than those found in our "Instructions to Purchasers."

SUCCESSFUL PLANTING AND CARE OF STOCK

CARE

The bundles should be opened immediately, the roots dipped in water, then heeled in moist ground so that the mellow earth will come in contact with the roots and thoroughly protect them from the air, having the earth tramped solid about them.

When ready to plant, take up only a few at a time, puddle the roots and do not allow them to lie exposed to the sun or air.

The ground should be carefully prepared by deep plowing and firming down with a disc and harrow.

PLANTING

The holes for planting must be large enough to receive the roots freely, without cramping or bending them from their natural position. All broken or mutilated portions of the roots must be cut off so as to leave the ends smooth and sound. All trees should be planted two or three inches deeper than they stood in the nursery row; pack the soil very firmly about the roots by tamping with the feet or post tamper, being careful not to bark or break the roots. Leave three inches of the surface soil loose to serve as a mulch. If the ground is very dry, apply one to two pails of water before this soil mulch is in place, and after the water has soaked away it can then be placed over the moist soil.

NUMBER OF TREES OR PLANTS TO THE ACRE

40 feet apart each way	28
30 feet apart each way	48
20 feet apart each way	110
18 feet apart each way	135
15 feet apart each way	205
12 feet apart each way	300
10 feet apart each way	435
8 feet apart each way	680
6 feet apart each way	1,210
5 feet apart each way	1,745
4 feet apart each way	2,725
3 feet apart each way	4,840

Rule—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant, which, divided into the number of square feet in an acre (43,560), will give the number of plants or trees to the acre.

SUITABLE DISTANCE FOR PLANTING

Apples—30 to 40 feet apart each way.

Standard Pears and Cherries—20 feet apart each way.

Plums, Peaches and Apricots—16 to 18 feet apart each way.

Dwarf Pears and Quinces—10 to 12 feet apart each way.

Grapes—rows of 10 to 16 feet apart; 7 to 10 feet in rows.

Currants and Gooseberries—4 feet apart.

Raspberries and Blackberries—3 to 4 by 5 to 7 feet.

Strawberries, for field culture—1 by 3 to 3½ feet.

Strawberries, for garden culture—1 to 2 feet apart.

Asparagus, for field culture—18 to 24 inches by 3½ to 4 feet.

Asparagus, for garden culture—18 to 24 inches apart each way.
